Re: Proposal for Drilling Services

Proposed Utility Installation

Duluth, Minnesota

AET Proposal No. 07-20124

Dear Mr. Christopher:

American Engineering Testing, Inc. (AET) is pleased to submit a proposal for the proposed utility project in Duluth, Minnesota. In this proposal, we present our understanding of the project, an outline of the scope of services we are to provide, a schedule for our services, and an estimate of our fees.

### **Project Information**

RS&H is requesting flight auger borings to determine subgrade conditions for utility installation. We understand the waterline will require a 7-foot deep trench. The borings will be completed between the fire station and missile storage building at approximately 100-foot intervals. No soil sampling has been requested.

### Scope of Services

### Field Exploration

AET will contact Gopher State One Call to clear public utilities prior to drilling. We request any private utilities would be marked by others. We understand that RS&H will stake the borings and provide elevations. Due to airport site restrictions, we request that RS&H provide all applicable access permissions and/or escorts for our crew.

You have requested flight auger (FA) borings to a depth of 10 feet or refusal. If we encounter refusal we will not attempt an offset boring. We will perform as many FA borings as time allows in 2 business days, up to 50 FA borings. We estimate we can complete between 35 and 45 borings.

We assume the borings will be accessible with a rubber-tired all-terrain drill rig. We will drill the borings using a 6-inch flight auger. No soil sampling has been requested for this project. The drill crew will record refusal depths and any groundwater encountered.

Boreholes will be sealed and reported per state requirements.

### Laboratory Testing

No laboratory testing has been requested for this project.

### Report

We will present a factual report presenting the conditions encountered, a table of refusal depths, and the drilling methods. The factual report will not include any boring logs or opinions and recommendations.

### Schedule

As discussed, we anticipate drilling to begin in approximately 4-6 weeks. Drilling will take 2 business days. We will submit a final data report within 7 business days of completion of drilling.

### **Fees**

For the scope of services outlined above, we will charge a lump sum fee of \$6,000. If additional borings or deeper borings are authorized, or if laboratory testing is requested, the increase in our fees will be in accordance with the unit prices shown on the enclosed 2018 fee schedule.

### **Environmental Concerns**

This proposal is presented for engineering services to evaluate the structural properties of the soils at the specified site. This proposal does not cover an environmental assessment of the site; environmental testing of the soil or groundwater; a wetland assessment; or consultation on lead, mold, asbestos, silica, or radon. If you wish to have us provide these additional services, please contact us.

### **Terms and Conditions**

Work will be completed in accordance with terms and conditions outlined in the RS&H Master Subcontract Agreement dated May 19, 2010.

### Acceptance

AET requests written acceptance of this proposal in the Proposal Acceptance box below, but the following actions shall constitute your acceptance of this proposal together with the Terms and Conditions and Amendments: 1) issuing an authorizing purchase order for any of the Services described above, 2) authorizing AET's presence on site or 3) written or electronic notification for AET to proceed with any of the Services described in this proposal. Please indicate your acceptance of this proposal by signing below and returning a copy to us. When you accept this proposal, you represent that you are authorized to accept on behalf of the Client.
